RELEVANT EXPERIENCE

Software Engineering Experience

Debog Automations & Unturned |

Pagadian City & Remote | October 2024 – Present

Core engineer behind two related US companies from launch.

- **Debog Automations** - Built business process systems, internal tools, and third-party integrations for multiple clients, replacing manual workflows and cutting up to 3+ hours of daily work per team. Increased client productivity by 30% through automation of repetitive tasks across operations.
- **Unturned** - Built the end-to-end liquidation platform for 100+ clients, covering product intake, a custom online store, shipping, and billing. Processed ~25,000 products through the system, contributing to \$2.6M USD in total savings for clients since launch. Designed and built internal tools, staff dashboards, and a custom RBAC (role-based access control) system to improve security and protect customer data.

Data Analytics Experience

Freelance | Pagadian City & Remote | July – October 2024

Executed comprehensive data analytics projects by extracting, cleaning, and analyzing large datasets, revealing actionable insights. Designed and developed dashboards to effectively communicate findings.
